FREEZE**

ANTICELLULITE GEL FREEZE

A specially formulated, cooling gel designed for skin care and improving its appearance, providing a refreshing cooling sensation upon application.

Key ingredients:

Colloidal silver, Caffeine, Ivy extract, Chestnut extract, Panthenol, Aloe vera.

The product is intended for the care of problematic areas prone to cellulite, supporting skin elasticity. Its formula includes ingredients that promote skin regeneration and skin smoothness. Application frequency: 2-3 times daily, with circular motions, to the desired areas. Recommended for daily use as part of a comprehensive body care regimen. Cellulite is a common skin condition characterized by the accumulation of fat deposits and toxins. There are three main types of cellulite:

- Fibrous cellulite: characterized by firm, deeper lesions
- Adipose cellulite: characterized by softer, more superficial lesions
- Water cellulite: characterized by uneven, diffuse lesions

Regular care and treatments targeting skin tone and microcirculation can help alleviate the appearance of cellulite.
